Strap Connector

Qty: 2

Face Mask Side

Qty: 2 (1 each side)

This side Up for Face Left

This Side Down for Face Right.

1 inch x 1 inch

Small Latex Surgical Style Face Mask by MrMucox

Instructions:
1) Cut out the pattern
2) Trace pattern onto latex. You'll need 2 of each piece. Rember to flip Mask portion over for second piece.
3) Cut 2 3/4" strips of latex long enough to go around your head as shown in picture.
4) Glue center seam
5) (Optional) Cover center seam with 1/2" strip of latex
6) Attach Strap connectors as desired.
7) Attach one side of straps by alligning with connector and butting up to mask. (Optional) trim end of strap to contour of mask
8) Fit mask to face and measure strap length. Adjust down a little so it's tight, but not too tight or it will cause the mask to buckle. Repeat step 7 for other side.
